RATECARD

2022

Ad Alliance is where powerful media players get together. We start with collaboration and always work with you to find the most optimal media formula for your brand and story. We enjoy using our knowledge and skills in this - from impactful reach campaigns to creative influencers who reach a specific target audience. Our product range aligns with every objective. Your needs are central to our collaboration and we go the extra mile to achieve your communication and marketing objectives. We work together to achieve the best result.

TV Spot

Our wide range of television channels means we reach almost everyone in the Netherlands. Tell us who you're targeting within that audience of millions: the general public or a more specific target audience? Suitable options are available for every budget.

When purchasing spot broadcasting time, we agree on two net basic prices per GRP in the media contract: a content and timeslot base price. The content base price applies to specific purchase types and Fixed Broadcast. The timeslot base price is intended for timeslot, target audience and theme packages. Each month has its own monthly index and our various purchase options have their own product index. The scheduling hierarchy is determined by the type of purchase you choose. We agree on all target audience indices in the contract. The Target Audience Packages for some target audiences can be purchased at a lower target audience index. For a good balance in supply and demand, we publish a monthly market index per product on our site.

Market indices

Market indices can vary from 85 to 115 per product and are published monthly on adalliance.nl.
